MeetUP TeamUP DevsUP

harishashim@gmail.com

In Dog eat Dog time

DEVS help DEVS

Platform for hiring developers!

... by DEVS for DEVS

(Gotta be DEVS to be in!)

__

Platform to freelance your service!

... by DEVS for DEVS

(Gotta be DEVS to be in!)

But we are going **TOO FAR AHEAD** of ourselves

NOT TOO FAST!

We want to hit the right spot

- → Pipeline to get and deliver
- → Collaboration between Devs
- → Challenge the Devs
- → Strengthen the Devs

Meet Leman.

Baru abis belajor, takde girlfriend lagi.

Nak jadi developer tapi buntu.

Apa belajar di universiti, hanyalah asas. Benda baru keluar tiap2 hari. Kalau problem, code tak jalan, cannot kipidap and just gibeup

Meet Ahmad.

Software Developer, anak 2 orang. Bini 2-3 orang (dalam perancangan).

Boleh baca spec, boleh implement.

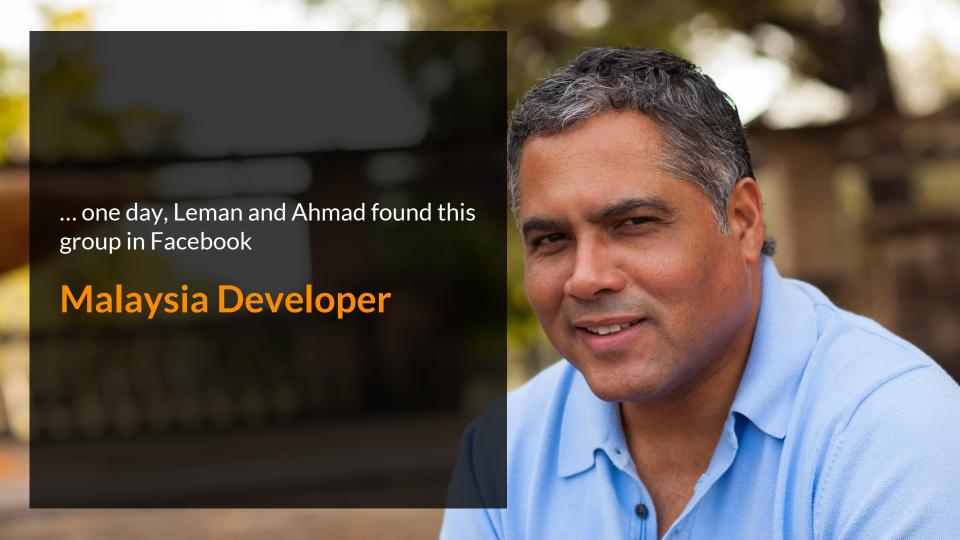

Buat kerja sorang-sorang sebab sungguh efisien dan bos nak jimat kos.

Ini konon2 nya anak Ahmad

Aku tak tahu apesal aku letak slide ni

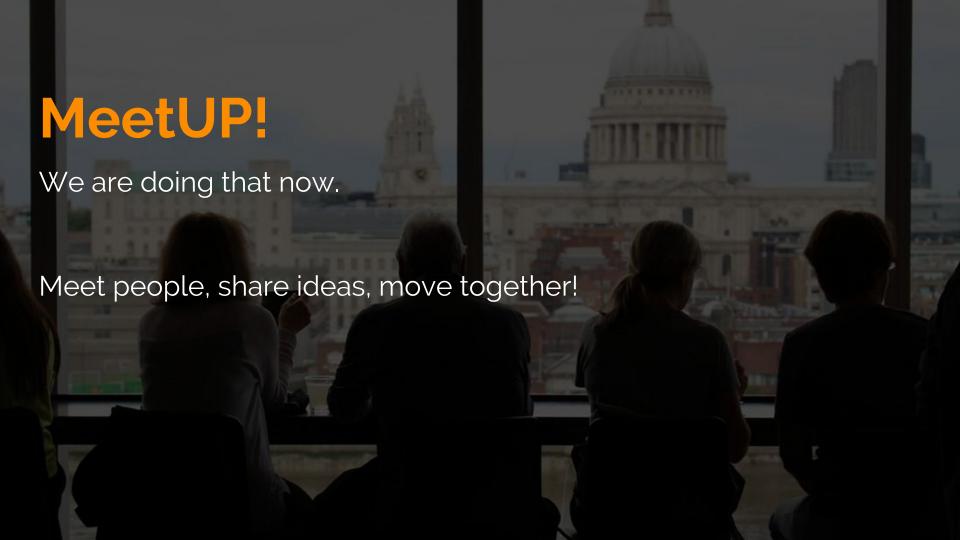

Adalah lebih afdhal bagi Leman dan Ahmad bekerjasama. Dalam bahasa Inggeris kita panggil ni "Mentorship"

Tip

DEVS tolong DEVS

Kalau bukan kita sapa lagi!

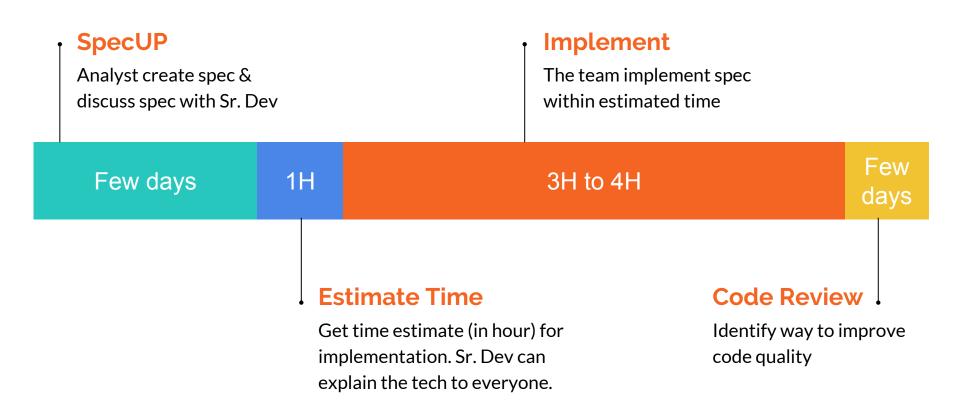

TeamUP!

We will do this.

Team up 3 Devs to do half day mini hackathon base on spec created in collaboration by Business Analyst, System Analyst and Senior Devs.

How We TeamUP (mini hackathon)

_

DevsUP!

Use TeamUP as "playground" or "controlled environment" to upgrade Devs skill. For example Fresh Devs can move up to Devs, Devs can move up to Sr. Devs and Sr. Devs can pickup skill to create spec.

What people are saying

TBA

Haji Leman, KL

TBD

Ahmad Al-Bob, Shah Alam

TBD

Kelvin, PutraJaya

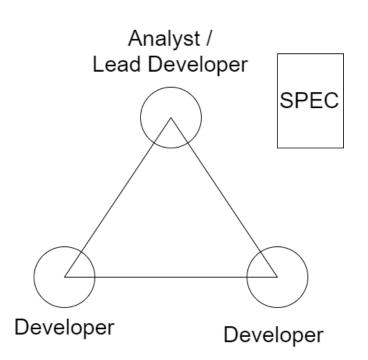

Attachment

A Triangle

Represent a team.

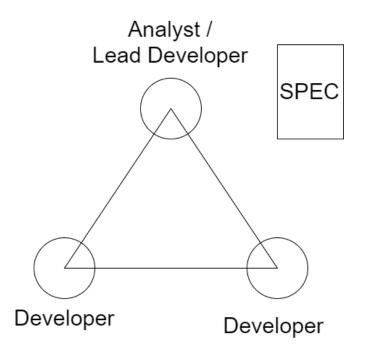

A Rectangle

Represent spec

A Team
Implement spec

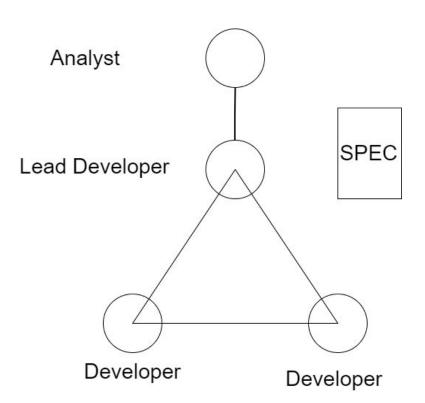

A Triangle

Represent the smallest unit of 3 developer. With Analyst and Lead that own the spec.

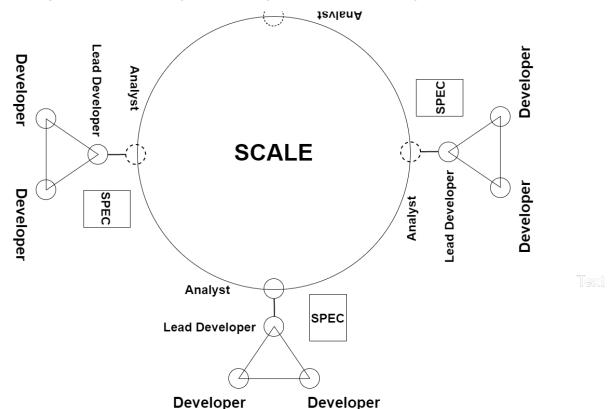

A Triangle Can be Extended

To represent 3 developer and 1 analyst. Analyst own the spec.

Big Circle is for Scaling

To represent many developer and 1 analyst.

Big Triangle Include Non Core Team

To include tester and designer.
